

## **DesignBUILD 2010 – building your home of the future**

In Melbourne in June the leaders of design and building will get together to share thoughts and ideas on how your home will be built in the future.

It's the DesignBUILD 2010 expo and it's all about what's new, innovative and sustainable in home design and construction – from building process and design layouts to interior fittings and landscaping.

This trade-only show is closed to the general public, but here's a sneak peek at some of the innovations that will be available to you in the near future from leading Australian and international suppliers.

- A new eco hot water system from Robert Bosche – captures the heat from the system exhaust to preheat incoming cold water. Installation of this system is equivalent to taking one and half cars off the road for an entire year.
- A world-first GreenTag™ from Ecospecifier Global, which will help you more easily identify products and companies that are meeting and raising the standards of green, eco-friendly building.
- Glass windows and doors from SmartTech Door Systems that disappear, with no annoying roll tracks or clumsy fold away techniques, allowing uninterrupted views of the outdoors.
- SpiraPave decking manufactured from recycled plastic, which is quickly installed and doesn't rust or degrade like traditional timber and metal deck structure.

The Italian Trade Commission have also organised visitors from Rome who will bring with them the latest in stone and tile fashion never before seen in Australia.

Held at the Melbourne Convention & Exhibition Centre from June 23 – 25, DesignBUILD 2010 is Australia's largest trade only design, building and construction expo and is co-located with CEDIA, a trade association of companies specialising in planning and installing home cinema, and the Plumbing Design Show.

It will showcase over 450 exhibitors and has attracted many big names as well as some really innovative Australian companies. Trades and professionals can attend for free by pre-registering at [www.designbuillexpo.com.au](http://www.designbuillexpo.com.au)

If you are interested in exhibiting please visit the website for more details.
